OVERVIEW

The DR-RGB/W-WIFI CON is a stand-alone color changing control system that utilizes both radio frequency and WiFi to control RGB, RGBW, CCT adjustable and static color LED products. Multiple controllers may be linked together wired or wirelessly. Radio frequency remotes are used for control or an application for your Android or Apple smart phone can also be downloaded for control over your wifi network. Setup custom scenes and zones on your remote or through the application. The remote and app can also work in conjunction with each other.

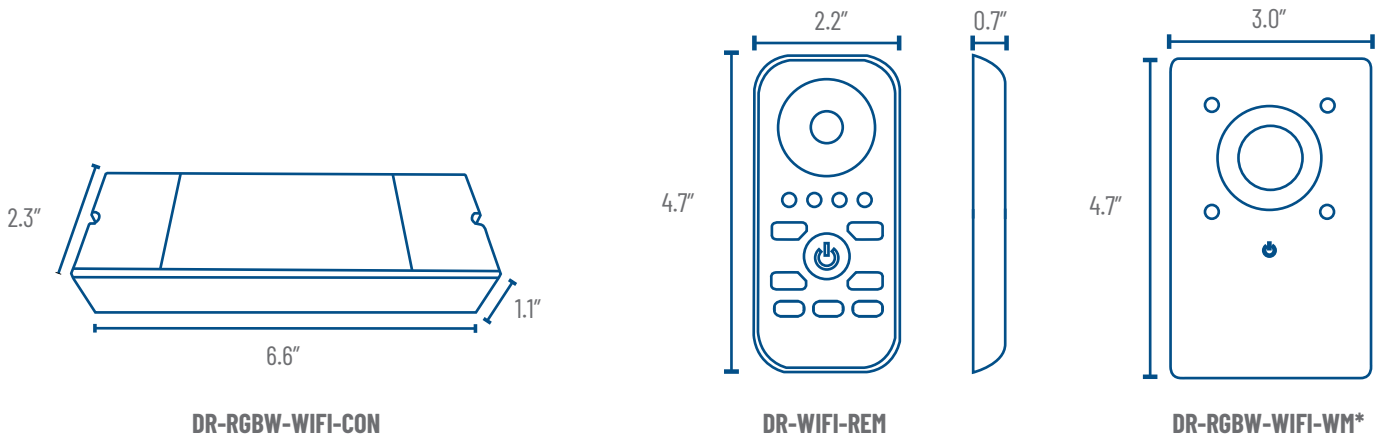

TECHNICAL SPECIFICATIONS

Input Voltage	12-36VDC
Output	4 x 8A (12V=96W, 24V=192W per channel) Static Color - 1, CCT-2, RGB - 3, RGBW-4
Control Zones	Wall Mount - 3, Remote - 4, App - 8
Custom Scenes	YES
Previous State Memory	YES
Individual Channel Control	YES
Dimmable	YES
Remote / Wall Mount Control	100ft
Mobile App Control	WiFi
Mobile App	EasyLighting EasyLife
Warranty	3 years

DIMENSIONS

*Wall mount remote uses radio frequency to talk to the controller. Run 120V to the single gang junction box and an included small step down transformer, which fits in the junction box, will power the remote.
